Optional digital unit, UT-118

The optional UT-118 provides D-STAR format digital voice and slow data communication. The UT-118 includes the following digital features.

Callsign calling

In the digital mode, your callsign and the receiving callsign (or CQ message) are included in each transmission. The callsign squelch allows you to choose an incoming call selected by the callsign. Also, received callsigns are automatically stored in the memory.

Position exchange with external GPS receiver

When connected to an external GPS receiver*, position information can be exchanged with other stations. When the receiving side is connected to a PC**, position monitoring is possible.

* NMEA 0183 output and RS-232C interface are required.

** Position mapping software required (Not supplied by Icom).

DX communication over the D-STAR system

The D-STAR repeaters for 144, 440MHz are now available. It allows cross band (144/440/1200MHz) operation and long distance communication over the D-STAR system.

7W powerful output power

A powerful 7W* output power provides superior transmit power. All this power is available with the supplied battery pack. Reduced power settings also allow you to adapt to the communication conditions and provide longer operating time.

* 5W for UHF.

200 memory channels and 10 memory banks

Up to 200 regular memory channels can be stored with a 6-character channel name, tone and duplex settings. The memory channels can be tagged with A-J bank name and allows you easy channel management. In addition, use Icom's exclusive DMS (Dynamic Memory Scan) system to scan selected memory banks by simply adding and deleting bank links.

Built-in CTCSS/DTCS

Built-in CTCSS/DTCS tone codes provide quiet stand-by and allow you to access a closed repeater. The pocket beep alerts you when a matched tone frequency is received. The tone scan detects the tone frequency used in the receiving frequency.

Other features

- NOAA weather channel receive * (* IC-V82 USA version only)
- Automatic repeater function (USA version only)
- Reversible control knob and up/down buttons assignment
- Durable construction and simple operation
- 16 DTMF dial memory
- PC cloning capability
